Title: "Celiac Disease Awareness"

Approximately 1 in 133 people have Celiac Disease. Unfortunately, 97% of Americans with Celiac don't realize it. Celiac Disease is the total intolerance to gluten; the protein in wheat, barley, and rye. Symptoms may include vomiting, diarrhea, constipation, migraines, arthritis, and liver problems. Celiac may lead to cancer and diabetes. If you or someone you love has suffered these symptoms, visit [celiac.org](http://celiac.org) or contact your healthcare provider. Be gluten free today!

###

Special thanks to [celiac.org](http://celiac.org) and the Celiac Disease Foundation for providing information to use in our PSA.
